

WATER RESTRICTIONS

Swimming Pool Water Use Plan & Exemption Application

Under the requirements of water restrictions, a customer wanting to fill an existing pool or spa with a capacity of 2,000 litres or more is required to submit a Water Use Plan to their government water utility for approval. The Water Use Plan should set out proposed water savings that will be achieved on an annual basis to off-set the volume of water required to initially fill the pool.

Notes

- As a demonstration of compliance with your Water Use Plan, please provide either:
 - photograph or digital images
 - a copy of receipts of products purchased or
 - Plumbing Industry Commission (PIC) Certificate of Compliance
- If you have previously fitted the water saving devices listed, your application may still be approved. Please indicate in each section those initiatives that you have completed previously.
- The savings shown in the following tables are indicative only and provide an approximate savings per year.
- Your government water utility reserves the right to undertake random audits for compliance with your Water Use Plan.
- For the purposes of the Drought Response Plan an 'existing pool' is defined as an existing structure that is maintained continuously at 75% or more capacity during the prevailing stage of restrictions.

Bathroom savings

Install or replace existing shower roses with a 3 star rated shower rose or flow control valve rated at 9 litres.

People in household	Typical litre savings per year
1	10,950
2	21,900
3	32,850
4	43,800
5	54,750

Estimated shower savings per year litres

Toilet

Install or replace toilet with a 6/3 litre (6 litre full flush/3 litre half flush or less) dual flush toilet.

People in household replacing	Typical annual litre savings by replacing an 11/5 litre dual flush (litres per year)	Typical annual litre savings by an 11 litre single flush (litres per year)
1	8,000	14,000
2	14,000	26,000
3	19,000	35,000
4	23,000	42,000
5	27,000	50,000

Estimated toilet savings per year litres
