Terms and conditions

- * Plumbing contractor is responsible for notifying the local council or VicRoads of the intention to commence works and notify them of the completion of the works in accordance with the *Road Management Act 2004*. The Road Management Authority may apply penalties for non-compliance.
- * Plumber to contact Greater Western Water (GWW) Developer Services team for water location/s.
- * Plumbers are required to set up the meter any assembly and advise GWW when the meter/s can be fitted. Meter/s up to 25mm only will be fitted within five working days.
- * Wet tapping's can be booked with Developer Services prior to tapping day in most cases.
- * Plumbing contractor to provide appropriate barricading and fully cover ALL excavations, or use temporary cyclone fencing, if left unattended.
- * For excavations over 1.5m in depth, contractor must comply with; *OH&S Act 2004* and No 10190, Mines (Trenches) Regulations, Code of Practice for Safety Precautions in Trenching Operations. Non-compliance with these trenching requirements will result in the tapping being postponed until the trench is compliant.
- * It is mandatory to provide the information requested under the heading Property Details. Without this information, GWW is unable to process the application.
- * GWW (and its agents) bears no legal liability for the accuracy of information pertaining to the location of water and sewer services. Plans are based on available information only. If you have difficulty locating services, please contact us for further assistance.
- * These conditions are binding on the current and future owners and occupiers of the property under section 145 of the *Water Act 1989*. Contact us if you have any queries, need assistance or are uncertain about how to complete the Direct debit request.
- * Additional conditions also apply to properties in a Class A Recycled Water Scheme.

Class A Recycled Water Schemes

- * In addition to the drinking water supply, all properties must be connected to Class A recycled for toilet flushing, clothes washing (residential only) and at least a front and rear garden tap.
- * All recycled water plumbing work must be in accordance to AS/NZS 3500-2015, the Recycled Water Plumbing Guide and any other requirements of the Victorian Building Authority (VBA) and GWW.
- * The appropriate type of Backflow Prevention Device must be fitted to the drinking and recycled water supplies after the water meter.
- * GWW will establish and maintain inspection procedures (which may be varied from time to time) which any owner, owner's agent or owner's plumber must comply with. GWW may enter the property to which these conditions apply at any reasonable time at your cost to perform an inspection.

Class A recycled water can be used for

Toilet flushing, irrigation, vehicle washing, fire fighting, ornamental ponds, construction, clothes washing machines.

Class A recycled water must not be used for

Drinking (human consumption), personal washing, cooking or kitchen use, indoor household cleaning, swimming pools or spas, recreational use (e.g. children under sprinklers).

I confirm that I have read and understood all the statements above.

I/we make application to GWW to alter the water supply according to the relevant acts and guidelines. I/We agree to comply with GWW's terms and conditions, as stated above.
